

Care Information

Below are some tips and care instructions for ensuring your Naomi Paul Lighting design looks beautiful and functions well for years to come.

MATERIAL

Egyptian Mercerized Cotton

To clean our cotton shades and pendants, Hoover regularly the surface using a handheld Hoover with a furnishing nozzle. The surface of the shade can also be gently wiped with a lightly dampened cloth to remove any static dust.

All our yarns are Certified by OEKO-TEX.

METAL

Lacquered Brass

Shade frames

Our shades and pendants are made with lacquered metal frames to ensure the hand-crafted fabrics do not encounter metals that tarnish over time as this could cause staining.

Raw Brass

Components

Standard raw brass parts include, bulb sockets, ceiling canopies, spacer rods, cord grips and optional suspension rods.

Raw brass parts will naturally patina over time and can be cleaned and polished if required. Please note, the pendant will need dismantling to do this, refer to the installation guide for further information.

Wall & Table Lights

Our wall and table lights are made using raw brass which will patina over time. The patina can be polished by hand using a mild brass polishing solution such as Brasso. Please read the instructions of the product you are using carefully before use.

*Note brass is a soft metal so can scratch easily so do not use any abrasive polishing materials.

Polishing Steps

- 1 - Remove bulb.
- 2 - Cover shade and cord with a plastic bag.
- 3 - Gently remove any dust on the metal arm and backplate.
- 4 - To polish, wearing gloves and support the arm with one hand. With the other hand using a soft polishing cloth, gently rub the metalwork with brass polish. Polish to desired finish.

Care Information

ELECTRCIAL COMPONENTS

Woven electrical cord

240v Electrical Cord - UK

We supply our lighting with 3 core triple insulated woven cord.

120v Electrical Cord - USA

We supply our lighting with 2 core triple insulated woven UL rated cord.

To dust the cord, use a lint roller or gently brush in a single direction with a very lightly dampened cloth. Ensure the light is switched off before cleaning the cord set.

Bulbs

We are always happy to make bulb recommendations for your order, for more information please email enquiries@naomipaul.co.uk.
